

| Sno | Module Name | Task |
|-----|-----------------|---|
| 1 | Authentication | Biometric authentication |
| 2 | Login | Save credentials |
| 3 | Raise Plan Work | Change title of Configuration Id field |
| 4 | Raise Plan Work | Change input mode of Configuration Id |
| 5 | Raise Plan Work | Minimize the difference between Plan Start time and current time. |

Description

Implement fingerprint authentication, passcode, and face id.

Show a checkbox on Login Screen with text "Remember Password" and save user's credentials if it is checked. When user logs in next time the username and password fields should be already filled with the saved credentials.

When user selects Category Description the Configuration Id Type field fills with a value. Change the title of Configuration Id field on "Personal Info" section to this value.

Take user's input for multiple Configuration Id separated by space such as "Test Test Test Test"

Reduce the difference to 3-4 minutes from 15 minutes and when user submits the created Plan Work for API check whether the selected Plan Start time is greater than current time.
